

ADDIDAS SALES PERFORMANCE ANALYSIS

Presented by:
Group 3

October 31, 2026

PROJECT BACKGROUND

This presentation provides a structured framework for analyzing sales performance across multiple dimensions using Excel dashboard data. It is designed to support data-driven strategic decision-making.

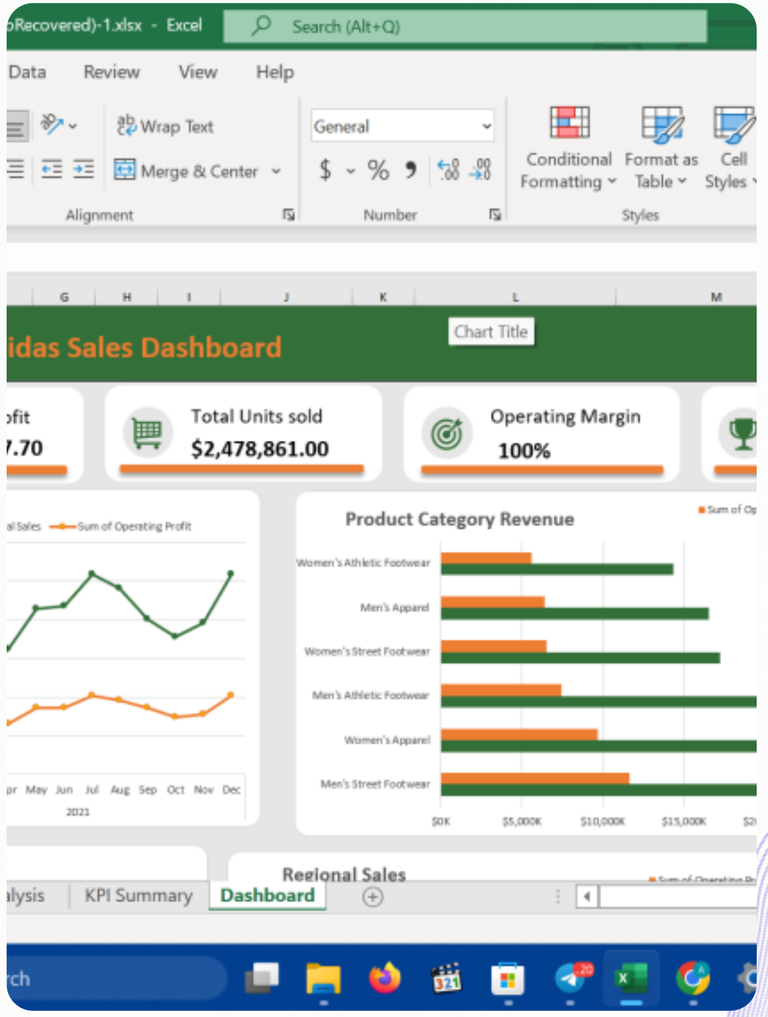

Context: Adidas sells through retail partners (Foot Locker, Walmart, Sports Direct) and through in-store, outlet and online channels. It collects sales data but hasn’t used it to guide decisions.

Problem: Adidas can’t clearly tell which products, retailers, channels and regions perform best or worst. That makes it hard to optimize marketing, pricing and inventory.

Scope and goal: The analysis covers 9,648 sales records (2020-2021) across 6 retailers, 5 regions, 6 products and 3 sales methods. The goal is to measure performance, find top and weak performers, and recommend actions for future campaigns.

EXCEL DASHBOARD OVERVIEW

Centralized view of sales KPIs and performance metrics.

Dashboard Features

Dashboard features: A single Excel sheet with KPI cards (sales, profit, units, margin, demand growth), eight charts covering time trend, product, region, retailer, sales method and demand growth, and a Product slicer for filtering.

Data Sources

Data sources: The Adidas Sales Database from the BeTechified capstone, with 9,648 records (2020-2021) across 6 retailers, 5 regions, 6 products and 3 sales methods. The Raw Dataset feeds the PivotTables behind the dashboard.

OVERALL SALES PERFORMANCE

Total Revenue

$120.17M

Total Units Sold

2.48M

Total Operating Profit

$47.22M

Number of Products

6

Number of Retailers

6

Performance Overview

AAcross 9,648 records, sales totaled $120.17M and operating profit was $47.22M (39.3% margin), with 2.48M units sold. 2021 recorded $95.93M across 8,346 records versus $24.24M across 1,302 records in 2020

PRODUCT CATEGORY PERFORMANCE

Men’s Street Footwear leads sales ($27.68M) and margin (42.0%). Women’s Apparel is second in sales ($23.87M; 40.6% margin). Women’s Athletic Footwear has the lowest sales ($14.32M), while Men’s Athletic Footwear has the lowest margin (36.1%). Year-on-year comparisons are affected by unequal record counts.

Top Performer

Category Trends

Key Insights

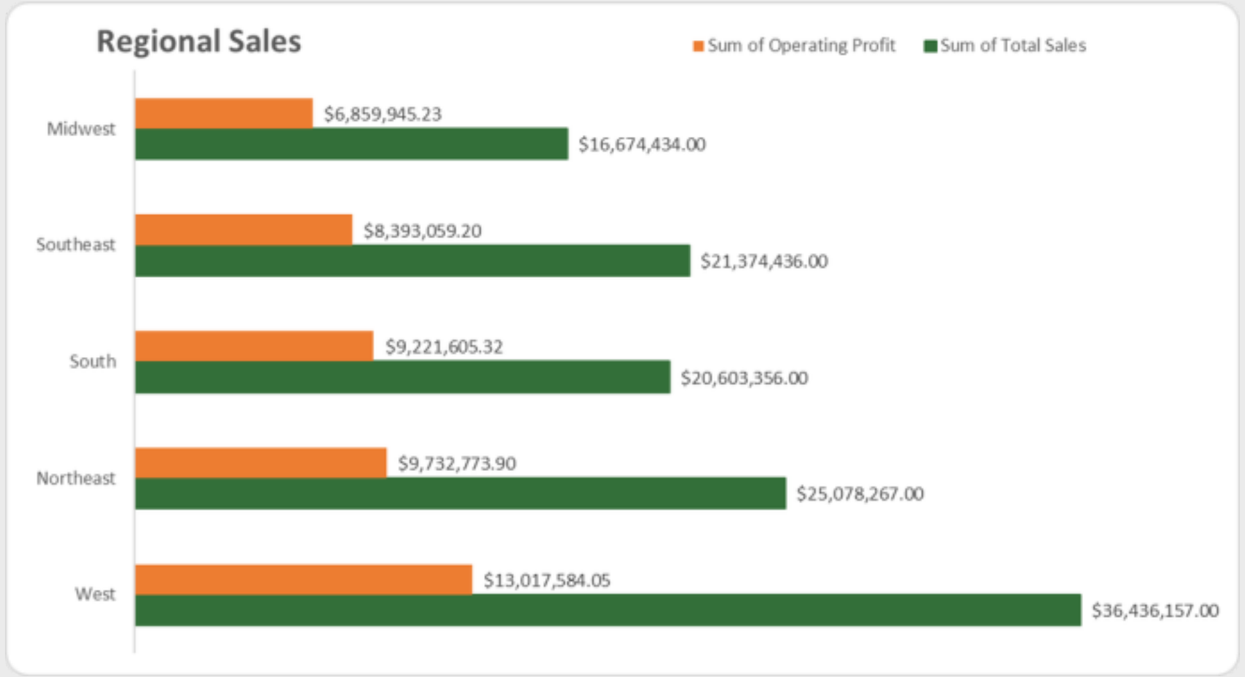

REGIONAL & STORE-LOCATION ANALYSIS

The West recorded the highest sales ($36.44M) but a 35.7% margin. The South had the highest margin (44.8%), while the Midwest recorded the lowest sales ($16.67M). Consider revenue and margin together when allocating regional resources.

Highest-Sales Region

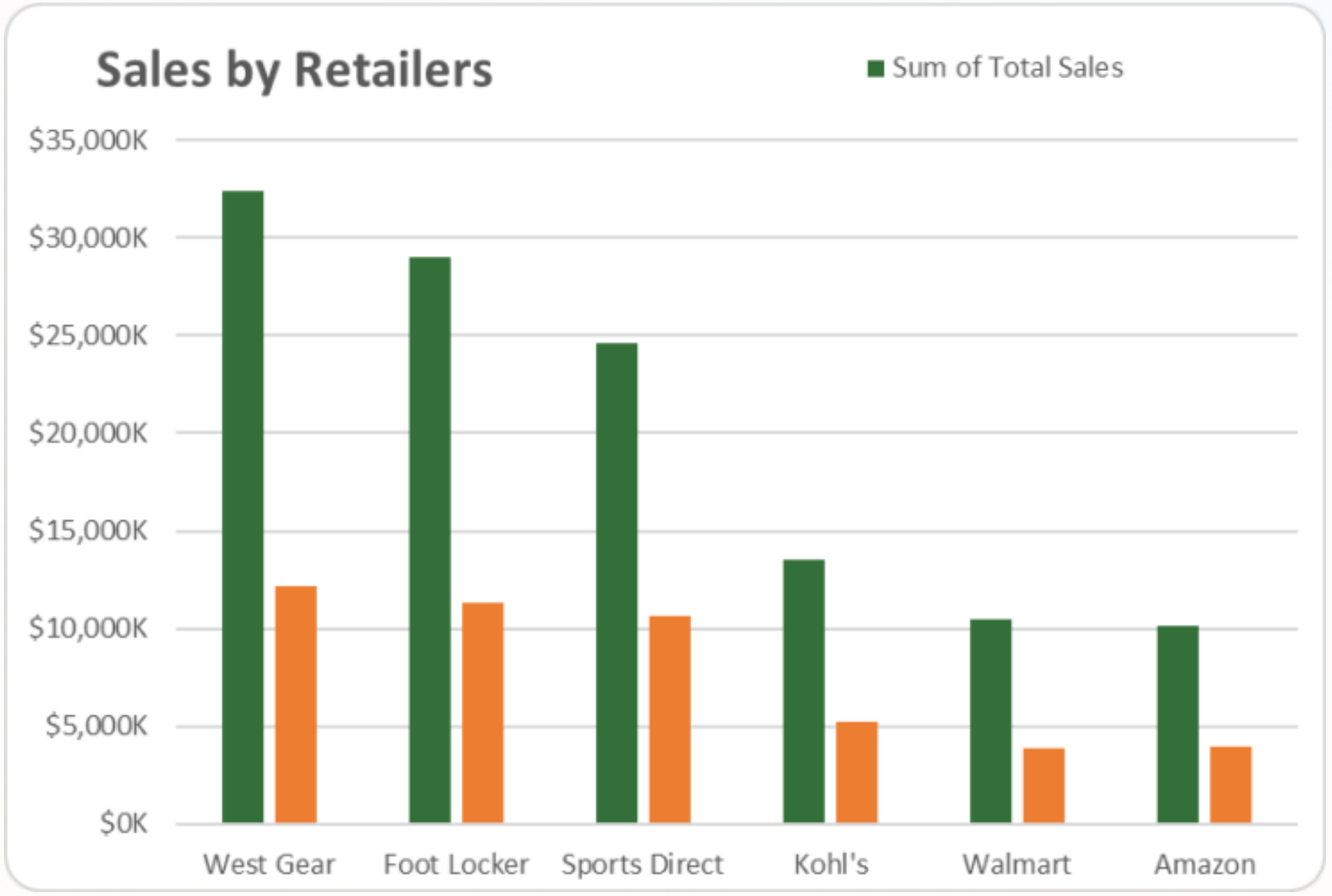

West

Sales: $36.44M | Margin: 35.7%

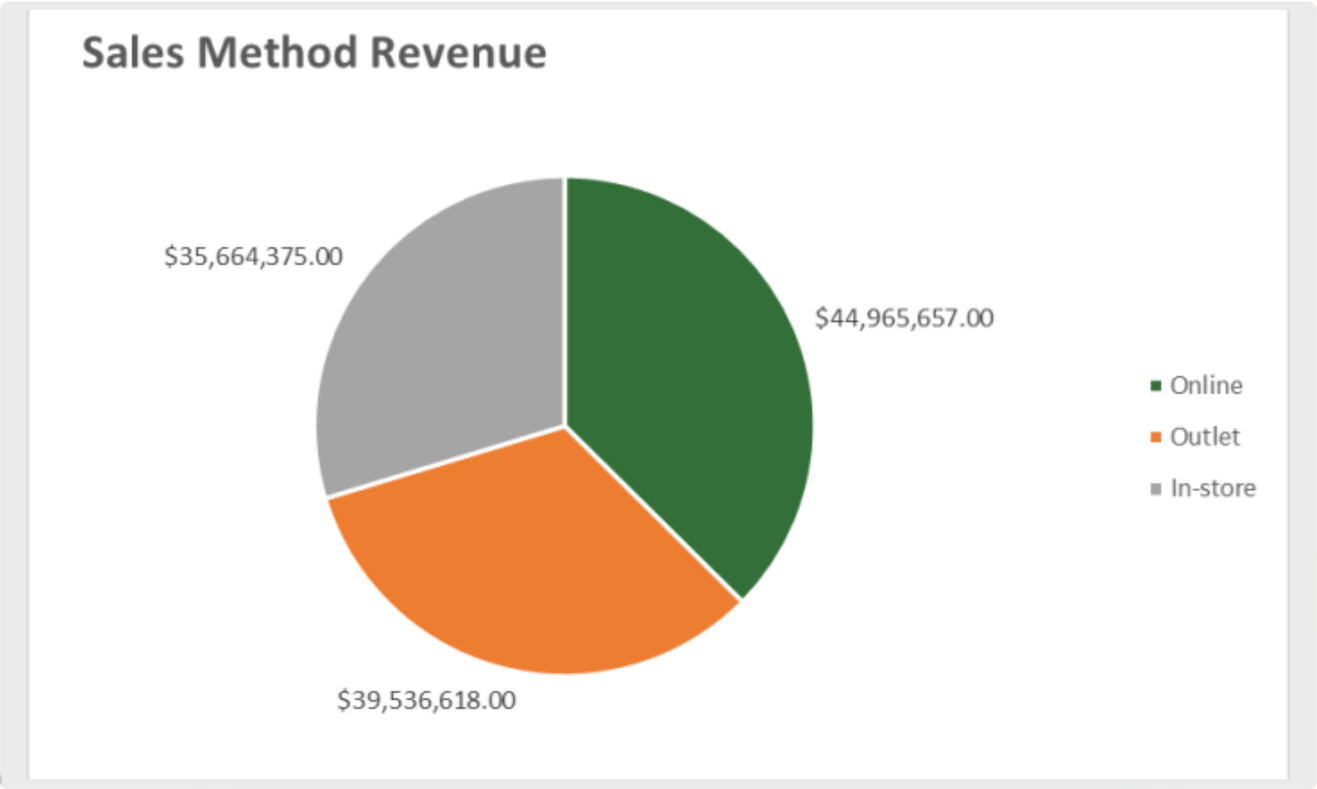

RETAILER PERFORMANCE REPORT

Top Retailer: West Gear
$32.41M sales

SALES METHOD ANALYSIS

Key Highlights

Online leads both revenue and margin in this dataset. Adidas should support online growth while reviewing in-store product mix, discounting and operating costs. Outlet can help manage excess inventory without relying on excessive discounts.

Method Notes

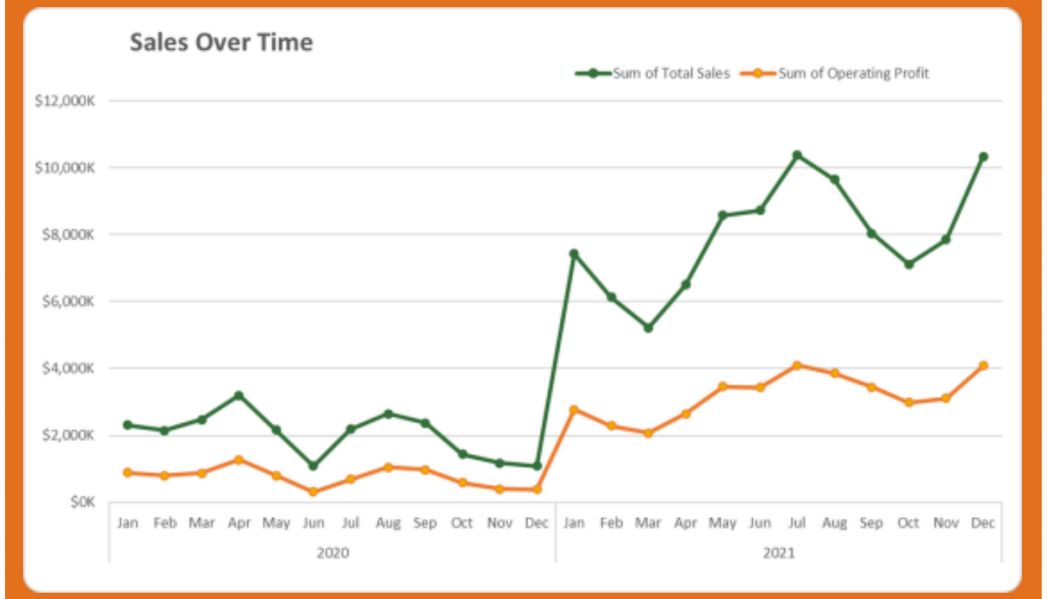

Online generated the highest sales ($44.97M), operating profit ($19.55M) and margin (43.5%). Outlet followed with $39.54M in sales and a 37.7% margin. In-store recorded $35.66M and the lowest margin (35.8%).

SALES TRENDS & PRODUCT DEMAND

Peak Sales Period

In 2021, Q3 led ($28.06M). July ($10.37M) and December ($10.34M) were the top months; March was lowest ($5.22M).

Sales Over Time

Increasing Demand

Declining Demand

Trend Summary

Recorded sales were $24.24M in 2020 and $95.93M in 2021, but the years contain 1,302 and 8,346 records respectively. This is not a like-for-like growth comparison. In 2021, July and December were the strongest months.

KEY FINDINGS

Findings - 1

1. Overall: Dataset totals were $120.17M in sales, $47.22M in operating profit (39.3% margin), and 2.48M units.
2. Year comparison: 2021 has 8,346 records versus 1,302 in 2020, so the recorded increase should not be treated as like-for-like growth.

Findings - 2

1. Products: Men's Street Footwear leads sales ($27.68M; 42.0% margin). Women's Athletic Footwear has the lowest sales ($14.32M); Men's Athletic Footwear has the lowest margin (36.1%).
2. Regions: West leads sales ($36.44M); South leads margin (44.8%).
3. Channels: Online leads sales ($44.97M) and margin (43.5%).
4. Retailers: West Gear leads sales ($32.41M); Sports Direct leads margin (43.2%).

BUSINESS RECOMMENDATIONS

Strategic recommendation areas based on Excel dashboard analysis.

Product Strategy:
Prioritize Men’s Street Footwear ($27.68M; 42.0% margin) and Women’s Apparel ($23.87M). Investigate lower sales in Women’s Athletic Footwear and the 36.1% margin of Men’s Athletic Footwear

Channel Optimization:
Online leads sales ($44.97M) and margin (43.5%). Invest in digital marketing and delivery; improve in-store margin (35.8%) and use outlets to manage excess inventory.

Regional Focus:
West leads sales ($36.44M) but margin is 35.7%; South leads margin (44.8%). Review the West’s product mix and costs, and investigate targeted opportunities in the Midwest ($16.67M sales).

BUSINESS RECOMMENDATIONS (CONTINUED)

Demand Forecasting

Use monthly sales and units sold to plan inventory and promotions. Review peak periods, compare forecasts with actual results, and validate record coverage before treating 2020-2021 changes as genuine demand growth.

Retailer & Partner Management

Maintain strong coordination with West Gear, the top retailer by sales ($32.41M). Study Sports Direct’s highest retailer margin (43.2%) and assess lower-sales retailers before changing support or stock allocation.
